

## Entry Level

Front-end web developer with a background in entrepreneurial business administration and 6+ years of experience working in the software industry. Pursuing an innovative team to leverage my newly developed skills in:

### Browser Based Technologies:

- HTML/CSS
- JavaScript/jQuery
- Responsive Design
- Bootstrap Handlebars
- Local Storage, Session Storage, IndexedDB
- React.js

### Databases:

- MySQL
- MongoDB

### Server-Side Development:

- User Authentication
- Progressive Web Applications (PWAs)
- MERN Stack (MongoDB, Express.js, React.js, Node.js)

### API Interaction:

- API
- JSON
- AJAX

Considered to have an excellent analytical eye for solutions development on the administrative side, I'm now eager and excited to apply my new knowledge towards the development sector by leveraging my upcoming full stack development certificate. With any project, my goal is to provide the best possible end user satisfaction, be it an internal or external customer, the user experience is always the keystone.

I've worked closely with a four person teams developing applications such Scrappi; a service to help people quickly parse though data and produce a short or long analysis using an open-source machine learning (AI) library from TensorFlow. First you can present one or multiple documents, determine the file type, and then, you will be presented with an analysis that you can either save to your profile or delete.

I'm anxious and eager to continue applying my skills as part of an ever changing, quality-centric team, crafting the highest quality of user experience on the web
